Plant Professional and Leadership Rotational Development Program

Inspiring science, enhancing life

Start your journey

The core programme lasts for 6 months. You will experience eight rotations within 3-months each in a different department, and then have the opportunity to choose a specific department where you would like to continue your internship at JM.

This gives you an exciting opportunity to advance your career as well as quickly experience and develop a breadth of understanding of one of the world's leading companies in sustainable technologies.

The Rollercoaster Ride

Mentorship

An aerial photograph showing a two-lane asphalt road that curves through a dense, green forest. The road runs parallel to a bright blue lake on the right side of the frame. The lighting suggests a sunny day, with shadows cast across the trees.
